

REMARKS BY GEORGIA TECH PRESIDENT G. WAYNE CLOUGH
INTRODUCTION OF NEAL LANE
OSTP Hearing Luncheon, October 13, 1999

It is a deep honor to welcome Dr. Neal F. Lane to Atlanta and to Georgia Tech. Dr. Lane is well into his second year as Assistant to the President for Science and Technology Policy and director of the Office of Science and Technology Policy, and all of us are pleased to have this distinguished leader speaking on our behalf in the Executive Office of the President.

We also remember with appreciation the outstanding leadership he provided during his five years as director of the National Science Foundation prior to moving to the White House.

He came to the NSF from Rice University, where he was provost and professor of physics. He interrupted his academic career at Rice twice – once to work for the NSF as director of the Division of Physics for a year and once to serve as Chancellor of the University of Colorado at Colorado Springs.

Dr. Lane is a fellow of the American Physical Society, the American Academy of Arts and Sciences, the American Association for Advancement of Science, and the American Association of Physics Teachers. He earned his B.S., M.S. and PhD. Degrees in physics from the University of Oklahoma.

We are delighted to welcome Neal Lane, and it is my pleasure to present him to you at this time.
